---

*Short report of two days spent in the east part of Belgium seeking once again for blue *Rana arvalis*... Forewarned by Peter Engelen (thanks !), I reached the place right in time at the "blue moment" and with a good weather (about 16°C, sunny). Some *Rana temporaria* were found along with *Bufo bufo* and a few *Lissotriton helveticus*.*

Also a lot of *Rana temporaria*...

Unlucky *Pelophylax*, stifled in the battle
