

Field Report, March 11-13th 2012 - Belgium

by Frank Deschandol

All pictures © F. Deschandol & Ph. Sabine

*As usual, I went this year again to Belgium, doing a trip fully dedicated to *Rana arvalis*. But this time, the temperatures, quite low and some changes to the habitat, made difficult my quest... So I got only a few pictures ; let see what about next year ! Once again, many thanks to Peter Engelen for his great help :)*

Eggs of *Rana arvalis* or *Rana temporaria* ?

Rana arvalis...

Bufo bufo bufo, amplexus with a dead female...
