

Field Report, September 2006 - Eastern France

by Frank Deschandol

All pictures © Frank Deschandol & Philippe Sabine

A few days were spend searching mainly for Pelobates fuscus close to the German border... I was lucky enough to find several specimens on a path. I also went to a place to find Bufo viridis and Bombina variegata. Only some youngs Bufo viridis could be found.

Bufo bufo bufo

Pelophylax kl. esculentus

Rana dalmatina

Bombina variegata
