

Field Report, August 27-28th 2013 - French Alps

by Frank Deschandol

All pictures © F. Deschandol & Ph. Sabine

*A quick look in the french Alps, looking for a secret spot where concolor Vipera aspis atra can be seen.
Only two specimens could be found within 2 days, the weather being rather cold and windy...*

Reptiles (3) :

Podarcis muralis
Zootoca vivipara
Vipera aspis atra

Amphibians (1) :

Rana temporaria

Total = 4 spp.
